ELSEVIER

European Journal of Operational Research 127 (2000) 639–641

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

www.elsevier.com/locate/dsw

Contents Volume 127

1 DEA and its use in the regulation of water companies
E. Thanassoulis

14 The role of OR specialists in 'do it yourself' spreadsheet development
J.S. Edwards, P.N. Finlay and J.M. Wilson

28 On comparing interval numbers
A. Sengupta and T.K. Pal

44 Application of Grey theory and multiobjective programming towards airline network design
C.-I. Hsu and Y.-H. Wen

69 The one-period bus touring problem: Solved by an effective heuristic for the orienteering tour problem and improvement algorithm
R. Deitch and S.P. Ladany

78 A directed acyclic graph representation of routing manufacturing flexibility
D. Borenstein

94 New modeling approaches for the design of local access transport area networks
H.D. Sherali, Y. Lee and T. Park

109 Counting your customers: Compounding customer's in-store decisions, interpurchase time and repurchasing behavior
C. Wu and H.-L. Chen

120 Flow shop and open shop scheduling with a critical machine and two operations per job
G.J. Kyparisis and C. Koulamas

126 Minimizing maximum lateness with job families
K.R. Baker and M.J. Magazine

140 Digital data networks design using genetic algorithms
C.-H. Chu, G. Premkumar and H. Chou

159 Reliability optimization of a series system with multiple-choice and budget constraints
C.S. Sung and Y.K. Cho

172 Performance evaluation and design of base stock systems
C. Duri, Y. Frein and M. Di Mascolo

189 A dynamic programming algorithm for the local access telecommunication network expansion problem
O.E. Flippo, A.W.J. Kolen, A.M.C.A. Koster and R.L.M.J. van de Leensel

203 A transformed two-stage method for reducing the part-usage variation and a comparison of the product-level and part-level solutions in sequencing mixed-model assembly lines
J. Zhu and F.-Y. Ding

PII: S0377-2217(00)00218-6

217 Editorial: Sixth International Workshop on Project Management and Scheduling
G. Ulusoy and S. Karabatı
220 On criticality and sensitivity in activity networks
S.E. Elmaghraby
239 Improving project cost estimation by taking into account managerial flexibility
T. Jørgensen and S.W. Wallace
252 Optimal timing of project control points
T. Raz and E. Erel
262 An equitable approach to the payment scheduling problem in project management
G. Ulusoy and S. Cebelli
279 The impact of resource flexibility and staffing decisions on cellular and departmental shop performance
J.B. Jensen
297 A polynomial activity insertion algorithm in a multi-resource schedule with cumulative constraints and multiple modes
C. Artigues and F. Roubellat
317 The disjunctive graph machine representation of the job shop scheduling problem
J. Błażewicz, E. Pesch and M. Sterna
332 On Not-First/Not-Last conditions in disjunctive scheduling
P. Torres and P. Lopez
344 Using intelligent backtracking to improve branch-and-bound methods: An application to Open-Shop problems
C. Guéret, N. Jussien and C. Prins
355 A linear programming and constraint propagation-based lower bound for the RCPSP
P. Brucker and S. Knust
363 A new LP-based lower bound for the cumulative scheduling problem
J. Carlier and E. Néron
383 A cutting plane algorithm for a single machine scheduling problem
K. Šorić
394 Experimental evaluation of state-of-the-art heuristics for the resource-constrained project scheduling problem
S. Hartmann and R. Kolisch
408 A multicriteria heuristic method to improve resource allocation in multiproject scheduling
A. Lova, C. Maroto and P. Tormos
425 Procedures for resource leveling and net present value problems in project scheduling with general temporal and resource constraints
K. Neumann and J. Zimmermann
444 Minimizing weighted tardiness of jobs with stochastic interruptions in parallel machines
M. Laguna, P. Lino, A. Pérez, S. Quintanilla and V. Valls
458 Scheduling multiple variant programs under hard real-time constraints
P. Jędrzejowicz and I. Wierzbowska

467 Sorting cropping systems on the basis of their impact on groundwater quality
C. Arondel and P. Girardin
483 Decentralized inventory control in a two-level distribution system
J. Andersson and J. Marklund
507 Second order symmetric duality in mathematical programming with F-convexity
S.K. Mishra

519 The core of a repeated n-person cooperative game
J. Oviedo
525 Network distance characteristics that affect computational effort in p-median location problems
D.A. Schilling, K.E. Rosing and C.S. ReVelle
537 An optimal procurement policy for items with an inventory level-dependent demand rate and fixed lifetime
H. Hwang and K.H. Hahn
546 Scheduling two machines that require multiple types of maintenance, for a single operation
G. Rabinowitz, S. Goren and A. Mehrez
565 Positioning automated guided vehicles in a loop layout
A.J.R.M. Gademann and S.L. van de Velde
574 Efficient lot-sizing under a differential transportation cost structure for serially distributed warehouses
M. Vroblefski, R. Ramesh and S. Zionts
594 An object relational approach for the design of decision support systems
A. Srinivasan and D. Sundaram
611 Further discussion on linear production functions and DEA
J. Zhu
619 Bidirectional planning: improving priority rule-based heuristics for scheduling resource-constrained projects
R. Klein
